

Founded in 2010, ERS provides design, installation and service for mechanical, air conditioning and commercial refrigeration applications. We believe in customising our solutions for each client, and draw on the expertise of our experienced team to produce innovative and practical solutions.

Originally established in Woodend, North Canterbury, to provide service to local businesses, we have consistently grown and expanded our services to accommodate the greater Canterbury region. Today we offer solutions for hospitality, retail and office spaces and new commercial and domestic builds. We are ideally suited for small to medium sized commercial projects requiring ventilation, air conditioning or refrigeration.

Custom Design

Installation

Maintenance

Our qualified and professional staff work closely as a team to ensure our customers get the best service. We strive for an efficient and economic delivery of all of our services and projects on behalf of our customers. We source our materials from the best suppliers in New Zealand, and push them for competitive prices. By offering alternative designs and professional advice, we deliver savings to our clients whenever possible.
